1. The following is an examiner's statement of reasons for allowance: as a matter of claim construction the examiner takes the "at least one pretreatment layer" in claim 1 as not being the layer that contains the printing composition (see page 2 of the specification). The limitations of a non-anodized aluminum alloy substrate in combination with the claimed pretreatment layer having dopant particles consisting of silica having a particle size of .02-5 microns in the claimed weight percent range, and the other limitations of claim 1, define over the cited prior art. Vermeersch et al. does not teach silica in the claimed size and weight percent range as noted by applicant. Newly cited Shaw and Tashiro et al. teach silica in the image or printing composition layer, not in a pretreatment layer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is

eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 22 January 2004 has been entered.
